In het nieuws, een bloemlezing

- *Zorgen over milieueffectrapportage in Nederland*
Milieueffectrapportage staat in Nederland onder druk, blijkt uit het onderzoeksrapport Milieueffectrapporten in Nederland: kwaliteit en kwantiteit, dat minister Van Nieuwenhuizen op 9 maart aan de Eerste en Tweede Kamer stuurde. De Commissie reageert met een brief op het rapport. Zij uit daarin haar zorgen. [↗](#)
- *Natuurherstel vraagt om scherpere keuzes*
Gebruik de ervaring in lopende natuurherstelprojecten bij de besteding van de 5 miljard die minister Schouten voor natuur ter beschikking stelt. Goed dat het belang van natuurherstel wordt gezien en dat de minister daar geld voor vrijmaakt. Natuurherstel blijkt nu al een uitdaging en klimaatverandering en bodemdaling maken het nog moeilijker om natuurdoelen te halen. De Commissie geeft de minister in overweging hier rekening mee te houden. [↗](#)
- *Toetsen? Nee, liever wegpoetsen*, Binnenlands Bestuur, 21 augustus 2020
Het aantal milieueffectrapportages is behoorlijk gedaald de afgelopen jaren. Over de rapporten die wel geschreven zijn, publiceerde Arcadis een kritische analyse. De Commissie m.e.r. trekt aan de bel. Binnenlands Bestuur sprak hierover met Eric van der Burg en Lourens Loeven, respectievelijk voorzitter en directeur van de Commissie. [↗](#)
- *Tijdig inzicht in milieueffecten biedt kansen voor de RES*
Hoe kan milieueffectrapportage bijdragen aan de RES? Vijf regio's onderzoeken dat in een pilot, samen met het Nationaal Programma RES en de Commissie. [↗](#)

- *Hulpmiddelen op de weg naar een circulaire economie. In: Milieu, december 2020*
De term 'circulaire economie' is niet meer weg te denken. In steeds meer beleidsplannen en projecten is er aandacht voor dit onderwerp. Mooi, maar hoe geef je concreet handen en voeten aan die ambities? En welke rol kan milieueffectrapportage spelen? [↗](#)
