

Bijlage 15: Informatiebladen / material safety data sheets (MSDS)

Inleiding

Lyondell Chemie Nederland B.V. (verder: LCNBV) heeft het voornemen om haar caustic waste water (CWW, looghoudend afvalwater) en twee brandbare stromen zelf te verwerken. Voor dit initiatief van LCNBV is een milieueffectrapport (MER) vereist op basis van categorie 18.2 van onderdeel C van het Besluit milieueffectrapportage, namelijk het verbranden of chemische behandeling van gevaarlijke afvalstoffen.

In het MER worden naast de voorgenomen activiteit verschillende alternatieven beschreven voor de verwerking van het CWW op de locatie van LCNBV op de Maasvlakte:

Het MER dient als ondersteunend document voor de besluitvorming tot het verlenen van de Wabo- en Waterwetvergunning en verschaft belanghebbenden informatie over het voornemen en de milieugevolgen van de voorgenomen activiteit en de alternatieven. Hiertoe behoren onder andere de gevolgen voor het oppervlaktewater, de externe veiligheid, de effecten op de luchtkwaliteit, geluid en de gevolgen voor natuur.

Voor een aantal thema's zijn uitgebreide studies uitgevoerd waarvoor aparte rapportages zijn opgesteld die een bijlage vormen van het MER.

In deze bijlage zijn de informatiebladen opgenomen van de te verwerken afvalstromen, namelijk:

Caustic waste water: Safety Data Sheet, 14 pagina';s gevarenkaart, 2 pagina's gevarenkaart, 2 pagina's
 Brandbare afvalstroom ARCRU: gevarenkaart, 2 pagina's gevarenkaart, 2 pagina's

4. First aid measures

4

4.1 Description of first-aid measures

General advice	 Consult a physician/doctor if necessary. Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid. Show this material safety data sheet to the doctor in attendance. Do not leave the victim unattended.
If inhaled	: Move the exposed person to fresh air at once. If breathing has stopped, perform artificial respiration. When breathing is difficult, properly trained personnel may assist the affected person by administering oxygen. Keep the affected person warm and at rest. Get medical attention immediately.
In case of skin contact	: Immediately flush affected area with plenty of water while removing contaminated clothing. Wash contaminated clothing before reuse. If irritation persists, get medical attention.
In case of eye contact	 Immediately flush eyes thoroughly with plenty of water and continue flushing for at least 15 minutes. Continue to rinse eye with clean water for 20-30 minutes, retracting eyelids often. Get medical care, preferably an ophthalmologist, urgently.
If swallowed	 If victim is conscious and alert, give 2-4 cupful's of milk or water. Never give anything by mouth to an unconscious person. Do not induce vomiting because of corrosive effects. Obtain emergency medical attention.
4.2 Most important symptoms	and effects, both acute and delayed
Symptoms	: corrosive effects

6. Accidental release measures	
6.1 Personal precautions, prote	ctive equipment and emergency procedures
Personal precautions	 Do not touch or walk through spilled material. Evacuate personnel to safe areas. Wear recommended personal protective equipment. Prevent further leakage or spillage if safe to do so.
6.2 Environmental precautions	
Environmental precautions	 Do not allow contact with soil, surface or ground water. Clean contaminated floors and objects thoroughly while observing environmental regulations. Keep non-involved personnel away from the area of spillage.
6.3 Methods and materials for c	ontainment and cleaning up
Methods for cleaning up	 Contain spill with dike to prevent entry into sewers or waterways. For large spills, dike and pump into properly labeled containers for reclamation or disposal. For small spills, soak up with absorbent material and place in properly labeled containers for disposal.
6.4 Reference to other sections See section 8 for additional P See section 13 for disposal in	PE information.

Hygiene measures	 Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.

Disclaimer

Multiple legal entities and registration numbers may be displayed in Section 1. The Recipient shall refer to the shipping documents to identify the legal entity that supplied this product.

This document is generated for the purpose of distributing health, safety, and environmental data.

Information is correct to the best of our knowledge at the date of the SDS publication. It is not a specification sheet nor should any displayed data be construed as a specification. Before using a product sold by a company of the LyondellBasell family of companies, users should make their own independent determination that the product is suitable for the intended use and can be used safely and legally. SELLER MAKES NO WARRANTY; EXPRESS OR IMPLIED (INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY WARRANTY) OTHER THAN AS SEPARATELY AGREED TO BY THE PARTIES IN A CONTRACT.

This product(s) may not be used in:

(i) any U.S. FDA Class I. Health Canada Class I. and/or European Union Class I medical devices, without prior notification to Seller for each specific product and application; or (ii) the manufacture of any of the following, without prior written approval by Seller for each specific product and application: U.S. FDA Class II Medical Devices; Health Canada Class II or Class III Medical Devices; European Union Class II Medical Devices; film, overwrap and/or product packaging that is considered a part or component of one of the aforementioned medical devices; packaging in direct contact with a pharmaceutical active ingredient and/or dosage form that is intended for inhalation, injection, intravenous, nasal, ophthalmic (eye), digestive, or topical (skin) administration: topacco related products and applications, electronic cigarettes and similar devices, and pressure pipe or fittings that are considered a part or component of a nuclear reactor. Additionally, the product(s) may not be used in: (i) U.S. FDA Class III Medical Devices; Health Canada Class IV Medical Devices; European Class III Medical Devices; (ii) applications involving permanent implantation into the body; (iii) life-sustaining medical applications; and (iv) lead, asbestos or MTBE related applications. All references to U.S. FDA, Health Canada, and European Union regulations include another country's equivalent regulatory classification.

Alkylate, Duopac, Duoprime, Filmex, MPDIOL, Polymeg, SAA-100, SAA-101, TBAc, Tebol, T-Hydro, and Tufflo are trademarks owned or used by the LyondellBasell family of companies. The presentation of numerical data, such as that used for physical and chemical properties and toxicological values, is expressed using a comma (,) to separate digits into groups of three and a period (.) as the decimal marker. For example, 1,234.56 mg/kg = 1 234,56 mg/kg.
